Summary

Backend Developer with experience in Java and API integration, expert in Spring Boot and MySQL Server. Finalist in Rajasthan Police Hackathon 1.0 for designing SMS and Feedback APIs, integrating Cloudinary for image uploads, and optimizing the complaint filing process for Rajasthan police Feedback System. Developed a robust Spring Boot Task Manager with MySQL, achieving a concise user experience. Proficient in Java Swing and JDBC for Login and Signup Application. Seeking a Backend Developer position to apply my Java and API integration skills to support a company's mission in software development.

Skills

API Integration • apis • Core Java • Java • gui • Swing • JDBC • JSP • Servlet • Git • Github • MVC • MySQL • Spring Core • Spring MVC • Thymeleaf • Spring Boot • J2EE

Projects

Police Feedback system 01/2024 - Present

Finalist in Rajasthan Police Hackathon 1.0 for the Police Feedback system. Contributed as a Java backend developer, designing SMS and Feedback APIs, integrating Cloudinary for image uploads, and optimizing the complaint filing process with Rajasthan Police.

The Github link of the project is -https://github.com/Arunodaya9027/RJPOLICE_HACK_1224_Atulya_1.git

Task Manager Application 12/2023 - Present

Developed a robust Spring Boot Task Manager with MySQL, integrating Thymeleaf for dynamic front-end and seamless CRUD functionalities, achieving a concise and intuitive user experience. Implemented MVC architecture and Thymeleaf templating for an intuitive user interface in a Spring Boot Task Manager application with MySQL backend.

The Github link of the project is -https://github.com/ishanberry/Task_Manager_SpringbootApp.git

Login and Signup Application 10/2022 - 11/2022

Java Swing (Frontend) and Backend as MySQL for storing the user data in the database and for Email via Java Mail API and for the connection of Java code with Database JDBC.

The Github link of the project is -<https://github.com/ishanberry/Login-and-Signup-appilication.git>

Experience

Codeclause

Java Intern 05/2023 - 06/2023

Codeclause is a msme company IT consulting firm that deals with software development for the client. Worked on two tasks given by the product manager:

- Resume builder application using iText API 7.8.2.
- Simple Java password generator, a console-based program that has certain parameters and uses math.random inbuilt library.
